

About Me

Experience Designer and Full-stack developer with experience in building web apps based on pure JavaScript. Successfully completed multiple unique projects, each one having its own set of accomplished challenges. Love to experiment with modern technologies. Looking forward to starting my journey as a full-stack developer at a company which will not only challenge me but helps me develop my skillset further.

Professional Experience

Web Application Developer, *Enlighten Infosystems*

Nov 2020 – Apr 2021 | Vadodara, India

- Built modern Web Application with Progressive Web App and JavaScript.
- Composed a real-time Web-App based on certificate verification that gives authority to the officials (University/Institute/Organization) to issue a certificate to the candidate and with many more other functionalities.
- Integrated Progressive Web App and worked for fetching data, animation, and structure offline. Firebase used for Database.
- Code available under Vericert  repository.

Software Intern, *Enlighten Infosystems*

May 2018 – Jun 2019 | Vadodara, India

- Wrote code on JavaScript using Visual Studio and Firebase.
- Evaluated project requirements & specifications correctly and developed a software application that surpassed the mentor's expectations.
- Code available under FreedomForFashion  repository.

Projects
